

**Listing and Amendments to the Claims:**

1. (Currently amended) A method of controlling serum glucose levels in an individual, said method including the step of administering to said individual a therapeutic food composition comprising a starch which is a waxy starch, a hydrothermally treated starch, or a combination thereof.
2. (Currently amended) A method of treating or preventing hypoglycaemia in an individual, said method including the step of administering to said patient a therapeutic food composition comprising a starch which is a waxy starch, a hydrothermally treated starch, or a combination thereof.
3. (Currently amended) A method of treating an individual susceptible to hypoglycaemic episodes to prevent or decrease hypoglycaemic episode(s), said method including the step of administering to said individual a therapeutic food composition comprising a starch which is a waxy starch, a hydrothermally treated starch, or a combination thereof.
4. (Currently amended) The method according to ~~any one of claims 1 to 3~~ claim 3 wherein said ~~waxy~~ starch is hydrothermally treated waxy starch.
5. (Currently amended) The method according to claim ~~[[4]]~~ 3, wherein said starch is hydrothermally treated starch which is heat moisture treated starch.
- 6-9. (Cancelled)
10. (Currently amended) The method according to ~~any one of the preceding claims~~ claim 3, wherein said individual has glycogen storage disease.
11. (Currently amended) The method according to ~~any one of 1 to 9~~ claim 3, wherein said individual has Type I or Type II diabetes.

12. (Currently amended) The method according to ~~any one of 1 to 9~~ claim 3, wherein said individual has liver disease.
13. (Currently amended) The method according to ~~any one of the preceding claims~~ claim 3, wherein the starch has an amylopectin content of at least 80%.
14. (Currently amended) The method according to ~~any one of the preceding claims~~ claim 3, wherein the starch is waxy maize starch.
15. (Currently amended) The method according to ~~any one of the preceding claims~~ claim 3, wherein said therapeutic food composition comprises per unit sufficient starch to maintain blood glucose concentration of greater than  $3.0 \text{ mmol l}^{-1}$  at 300 min post administration.
16. (Currently amended) The method according to claim ~~[[10]]~~ 11, wherein said therapeutic food composition comprises per unit sufficient starch to maintain blood glucose concentration of greater than  $2.25 \text{ mmol l}^{-1}$  at 450 min post administration.
17. (Currently amended) The method according to ~~any one of the preceding claims~~ claim 3, wherein said therapeutic food composition comprises per unit dose greater than 50 g of starch.
- 18-30. (Cancelled)
31. (Currently amended) A therapeutic food kit, said food kit comprising:  
a) a therapeutic food composition as defined in ~~any one of claims 1 to 17~~ claim 3; and  
b) instructions for ingesting said therapeutic food composition.
32. (Cancelled)
33. (Currently amended) A sports nutrition foodstuff comprising a starch, wherein said starch is a waxy starch, ~~and/or~~ a hydrothermally treated starch, or a combination thereof.
